

LEADERSHIP TEAM DIAGNOSTIC

Team A.T.T.U.N.E.™ Diagnostic

How we operate together

Rate how your team operates **today** — not how you would like it to. There are no right answers, only honest ones. Your responses will show exactly where your team's performance is being supported, or quietly limited, by the conditions currently in place. For each statement, circle the number that best reflects your team's actual behavior.

*As you rate each statement, notice where you hesitated.
Hesitation is data.*

Reflection Questions

These two questions are the most important part of this diagnostic. Answer them honestly before reviewing your ratings.

19. Which of the six A.T.T.U.N.E.™ dimensions creates the greatest drag on your team's performance today?

20. What is the cost of leaving it unresolved?

Your team may see this differently.

This diagnostic reflects how you experience your team. The full A.T.T.U.N.E.™ Team Assessment reveals the gap between how you see your team and how your team experiences itself — often where the most important work lives.

“Teams don't fail at strategy. They fail at the human conditions that make strategy executable.”
